Alpha**Mobile**

AlphaLogix
the logical choice

Enable your mobile workforce to do more!

Maximise the potential of your CRM software, with the addition of AlphaMobile! The iOS compatible application allows mobile workers to receive jobs straight to their mobile phone/tablet. Implementing AlphaMobile will allow your workers to:

Say no to paper

Never lose or spill coffee on a paper job sheet again! We can customise your job sheets to add them to AlphaMobile, meaning you will always have an electronic store in your CRM!

Add Products/Photos to jobs

Mobile workers can store photos of completed work, or any additional products they have had to use in doing so; keeping your records precise and up-to-date!

Signature Capture

Capture your customer's signature to confirm that they are happy with the work. Your office staff can then immediately invoice their accounts for the work!

Purchase AlphaMobile from as little as £65 per user/per month…
