

Senior Software Developer C#

An exciting opportunity for enthusiastic and innovative C# developer to join our team of developers.

Established in 1995, AlphaLogix has become one of the largest Accredited Sage Business Partners and Developers in the UK and are highly regarded developers in the Sage Community. We specialise in the development of CRM and Sage Accounting/ERP solutions, bespoke programming, web-based solutions and the development of applications.

Successful applicants will be working as part of our team of highly-skilled developers where we encourage new ideas and share suggestions. Lots of innovation has come from the team through the company's history so we are looking for people to join us who are able to add real value. We are currently working on many varied and interesting projects for our rapidly expanding client base and are continually adding to our portfolio of products.

This is a great role for someone who would like to be involved with a friendly, growing company and who likes to see a project through its complete life-cycle, from initial analysis to successful installation.

Required Skills:

- C# Development, essential.
- Good understanding of Microsoft's .Net environment.
- SQL Server and Visual Studio.

Desirable Skills:

- Sage 200 and CRM software an advantage.
- Web development
- Mobile development
- Desire to evaluate and improve existing processes and implement new processes.

Personal Skills

- Excellent problem solving abilities.
- Self motivated with good time management, written and communication skills.
- Desire to operate in a fast-paced environment as part of a highly skilled team.
- Experience of working with processes such as software development life-cycles and change management.

Responsibilities:

- Write bespoke software and develop Windows and Web-based solutions/applications.
- Full project life-cycle, prepared to take ownership of issues raised and pursue until resolved.
- Configure software and install onto client's systems.
- Produce documentation and liaise with client's when necessary.

Salary negotiable, depending on qualifications and experience

Job Types: Full-time, Permanent
