What are the differences?
Sage 200 Standard
vs
Sage 200 Professional

Sage 200 is a set of powerful finance, accounting and ERP software modules that integrate together to manage and automate business accounting processes outside the core financial ledgers for nominal, sales, purchasing and cash book.

The system has been designed for small to medium-sized businesses and enables you to share information across the whole business, all through one integrated solution. Sage 200 is available in two different versions, Sage 200 Standard and Sage 200 Professional.

Sage 200 Standard is a straightforward cloud-based accounts solution and Sage 200 Professional has all the features of Standard, plus it is customisable and has supercharged extra features and modules. The Professional version can be installed in the Cloud or as On-Premise, and Standard is only available for use in the Cloud.

Sage 200 Standard

Sage 200 is a set of powerful finance, accounting and ERP software modules that integrate together to manage and automate business accounting processes outside the core financial ledgers for nominal, sales, purchasing and cash book.

- ✓ Control your business with core financial and stock management functions
- ✓ Manage your business on the move through the cloud, connected to Microsoft 365
- ✓ Build and access powerful data insights on the go, in the familiar environment of Excel
- ✓ Reduce complexities with bank feeds
- ✓ Update and delete records quickly with built-in reports, helping you with GDPR obligations
- ✓ Bill of Materials for simple manufacturing processes

Sage 200 Professional

All the power of Standard, plus customisable supercharged features.
